#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

This action is in response to Applicant's submission dated April 9, 2010, in which Applicant amended claims 1, 7-8, and 11; and cancelled claims 3-6 and 16.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

i) Claim 7 is dependent on claim 1 and compounds Ex. No. 1-6, 9, 13-18 all lack antecedent basis in claim 1 because they all of which have the group:

attached to the bicyclic group via  $-C(=O)-$  or  $-CH_2-$

as compared to the genus in claim 1 which has the group:

As such, the pyrrolidines of species claim 7 lack antecedent basis as compared to the cyclopentyls of genus claim 1. It appears that the generic support for the above species was

Art Unit: 1624

present in the groups  $-\text{CH}_2\text{NR}^3\text{R}^4$  and  $-\text{CONR}^3\text{R}^4$  which have been deleted from claim 1.

Correction is required.

ii) Compounds 1, 4, and 5 in claim 7 have a nitrogen atom with open valency, see for example, the compound Ex. No. 1:

wherein the "-N-" between the bicyclic group and the cyclopentyl has an open valency. This rejection may be obviated by amending this nitrogen to "-NH-" group.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 7-8, and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement because it has been amended to recite several new matter groups. All claim limitations must find support in the specification as originally filed.

There is no support for the groups in the specification as originally filed as these two groups were introduced in the preliminary amendment filed on August 23, 2006.

To obviate this rejection, Applicant must show support for these newly added claim limitations.
